

# ROOFING & CLADDING EXCELLENCE

Specialists in commercial sector buildings

[www.macgroupuk.com](http://www.macgroupuk.com)

Kings Cross Projects, London  
Hot Melt, Single Ply, Green Roofing, Standing Seam & Specialist Wall Cladding

# MAC is trusted by commercial clients nationwide to deliver dynamic, modern spaces in which people can work.

## Roofing and cladding expertise with a diverse range of skills

With one of the widest skill-sets in the industry, MAC has the experience and capability to deliver high quality roofing and cladding solutions for many types of commercial or industrial projects nationwide

## Delivering high quality projects for commercial clients

The commercial sector is vibrant and varied, embracing everything from major new build retail developments to office refurbishments, community centres, hotels and everything in between.

The range of products used is also extremely varied, with client preference, building type and other practicalities all playing an influential role in system choice.

MAC's expertise in multiple roofing and cladding systems means that we are perfectly placed to take on commercial projects of all kinds. From inverted roofs and podium decks to warm roofs, green roofs and specialist cladding, our broad skill-set will perfectly complement the creativity of any specification.

## The MAC difference

- ✓ Experience in new build & refurbishment projects
- ✓ Practical problem-solving approach to ensure that waterproofing integrity is maintained at all times
- ✓ Ability to deliver value for money & outstanding results
- ✓ Exceptional Health & Safety record
- ✓ Assistance in choosing systems to help meet sustainability targets
- ✓ Multi-disciplined skill-set providing a highly effective single source solution
- ✓ Carbon Zero certified with ISO 9001, 14001 & 45001 accreditation

## Completing projects safely

MAC employs over 150 operatives, including roofers, cladders, joiners and plumbers, giving our clients access to an unrivalled, multi-disciplined installation service.

Safety is also extremely important when carrying out roofing or cladding projects of any kind. The health and wellbeing of all individuals onsite is our number one priority and we take all necessary steps to achieve this. MAC has an outstanding health and safety record and holds numerous industry accreditations in this area.

## Exceptional technical support

Our friendly team of technical experts have the expertise and insight that will help ensure that your project runs smoothly, ultimately saving you money.

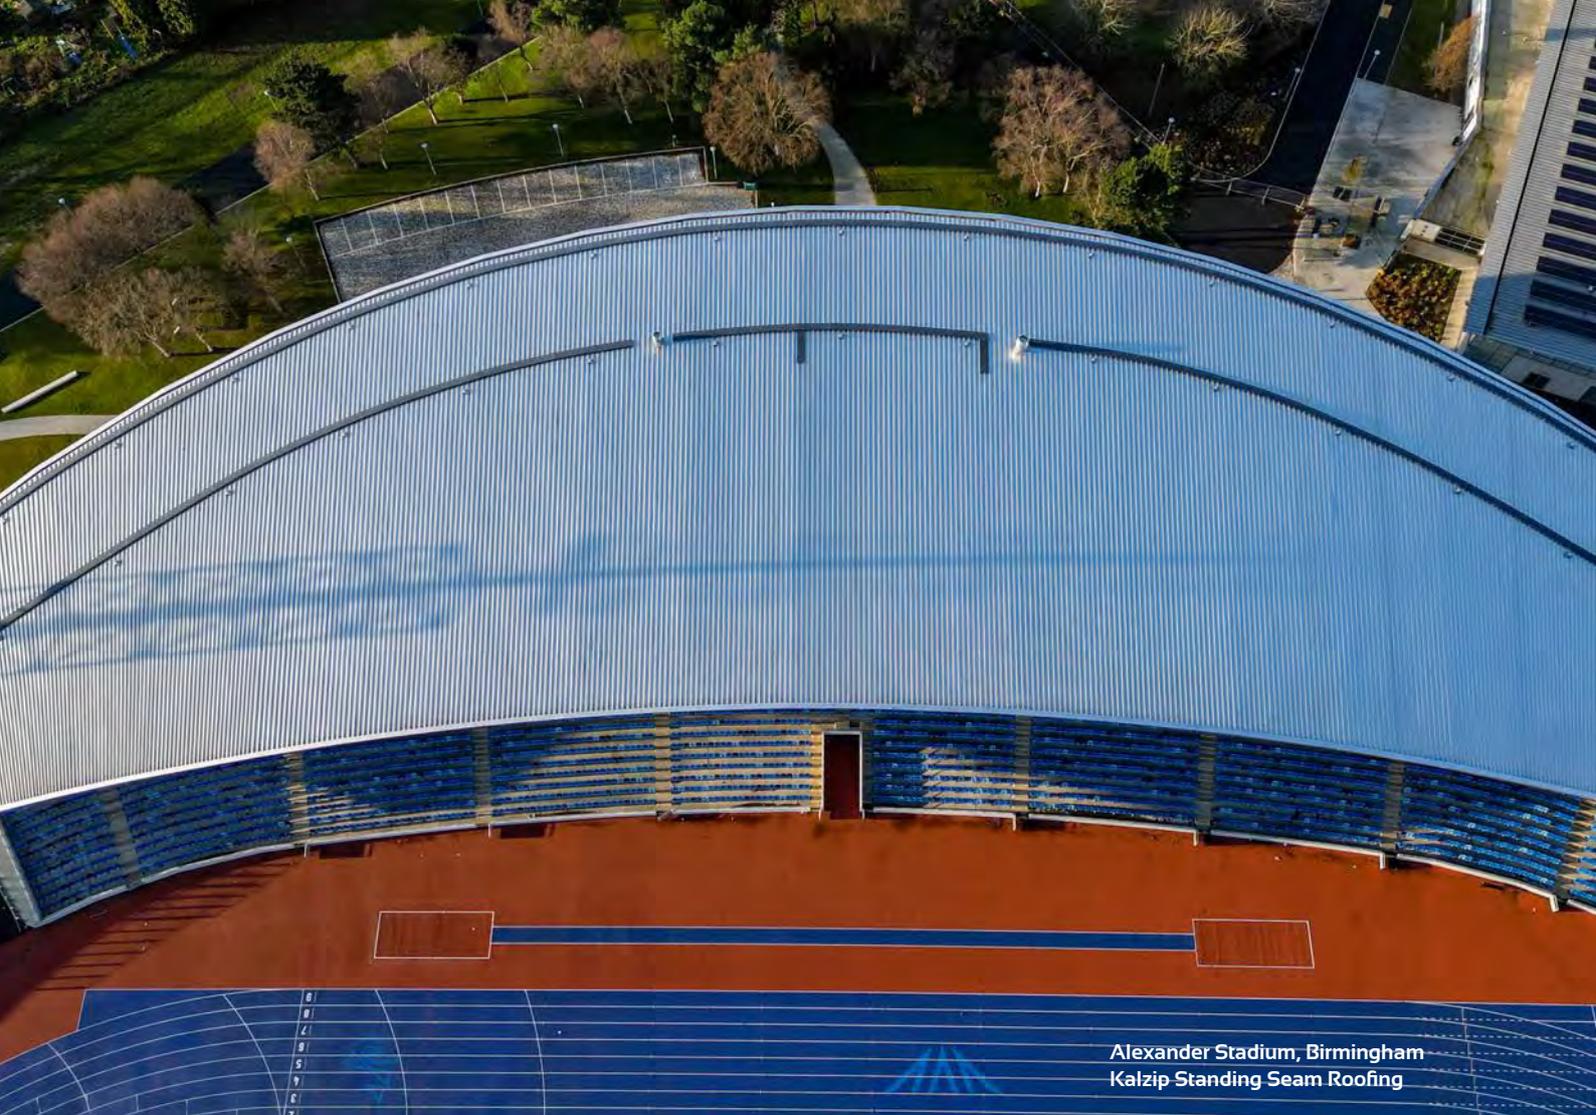

At MAC we install quality roofing and cladding systems from the UK's leading manufacturers which are fully supported by meaningful guarantees.

In addition, we provide a full technical support service, including:

- ✓ Initial advice & guidance
- ✓ On-site surveys
- ✓ Comprehensive reports
- ✓ Bespoke specifications

St. John Bosco, Battersea  
Monolithic Hot Melt with Intensive Green Roof Finish

Alexander Stadium, Birmingham  
Kalzip Standing Seam Roofing

## Minimising disruption

The diverse nature of the projects we work on demands a flexible approach that minimises disruption to our clients. We understand that waterproofing activities may only be possible during certain times of the day, and our experienced Project Managers therefore ensure that all onsite work is carried out considerately and safely.

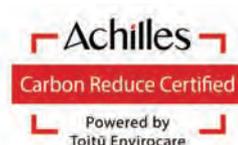

When working on occupied buildings, we endeavour to organise deliveries and installation services so that day-to-day activities can continue unaffected. We are also experienced in working in live working environments, some of which may be sensitive or particularly high risk, and our fully trained and badged Operators carry all of the necessary approvals and accreditations that may be required.

## Caring for the environment

At MAC we create living and working spaces for people to enjoy, making a positive difference to the occupants of buildings and local communities.

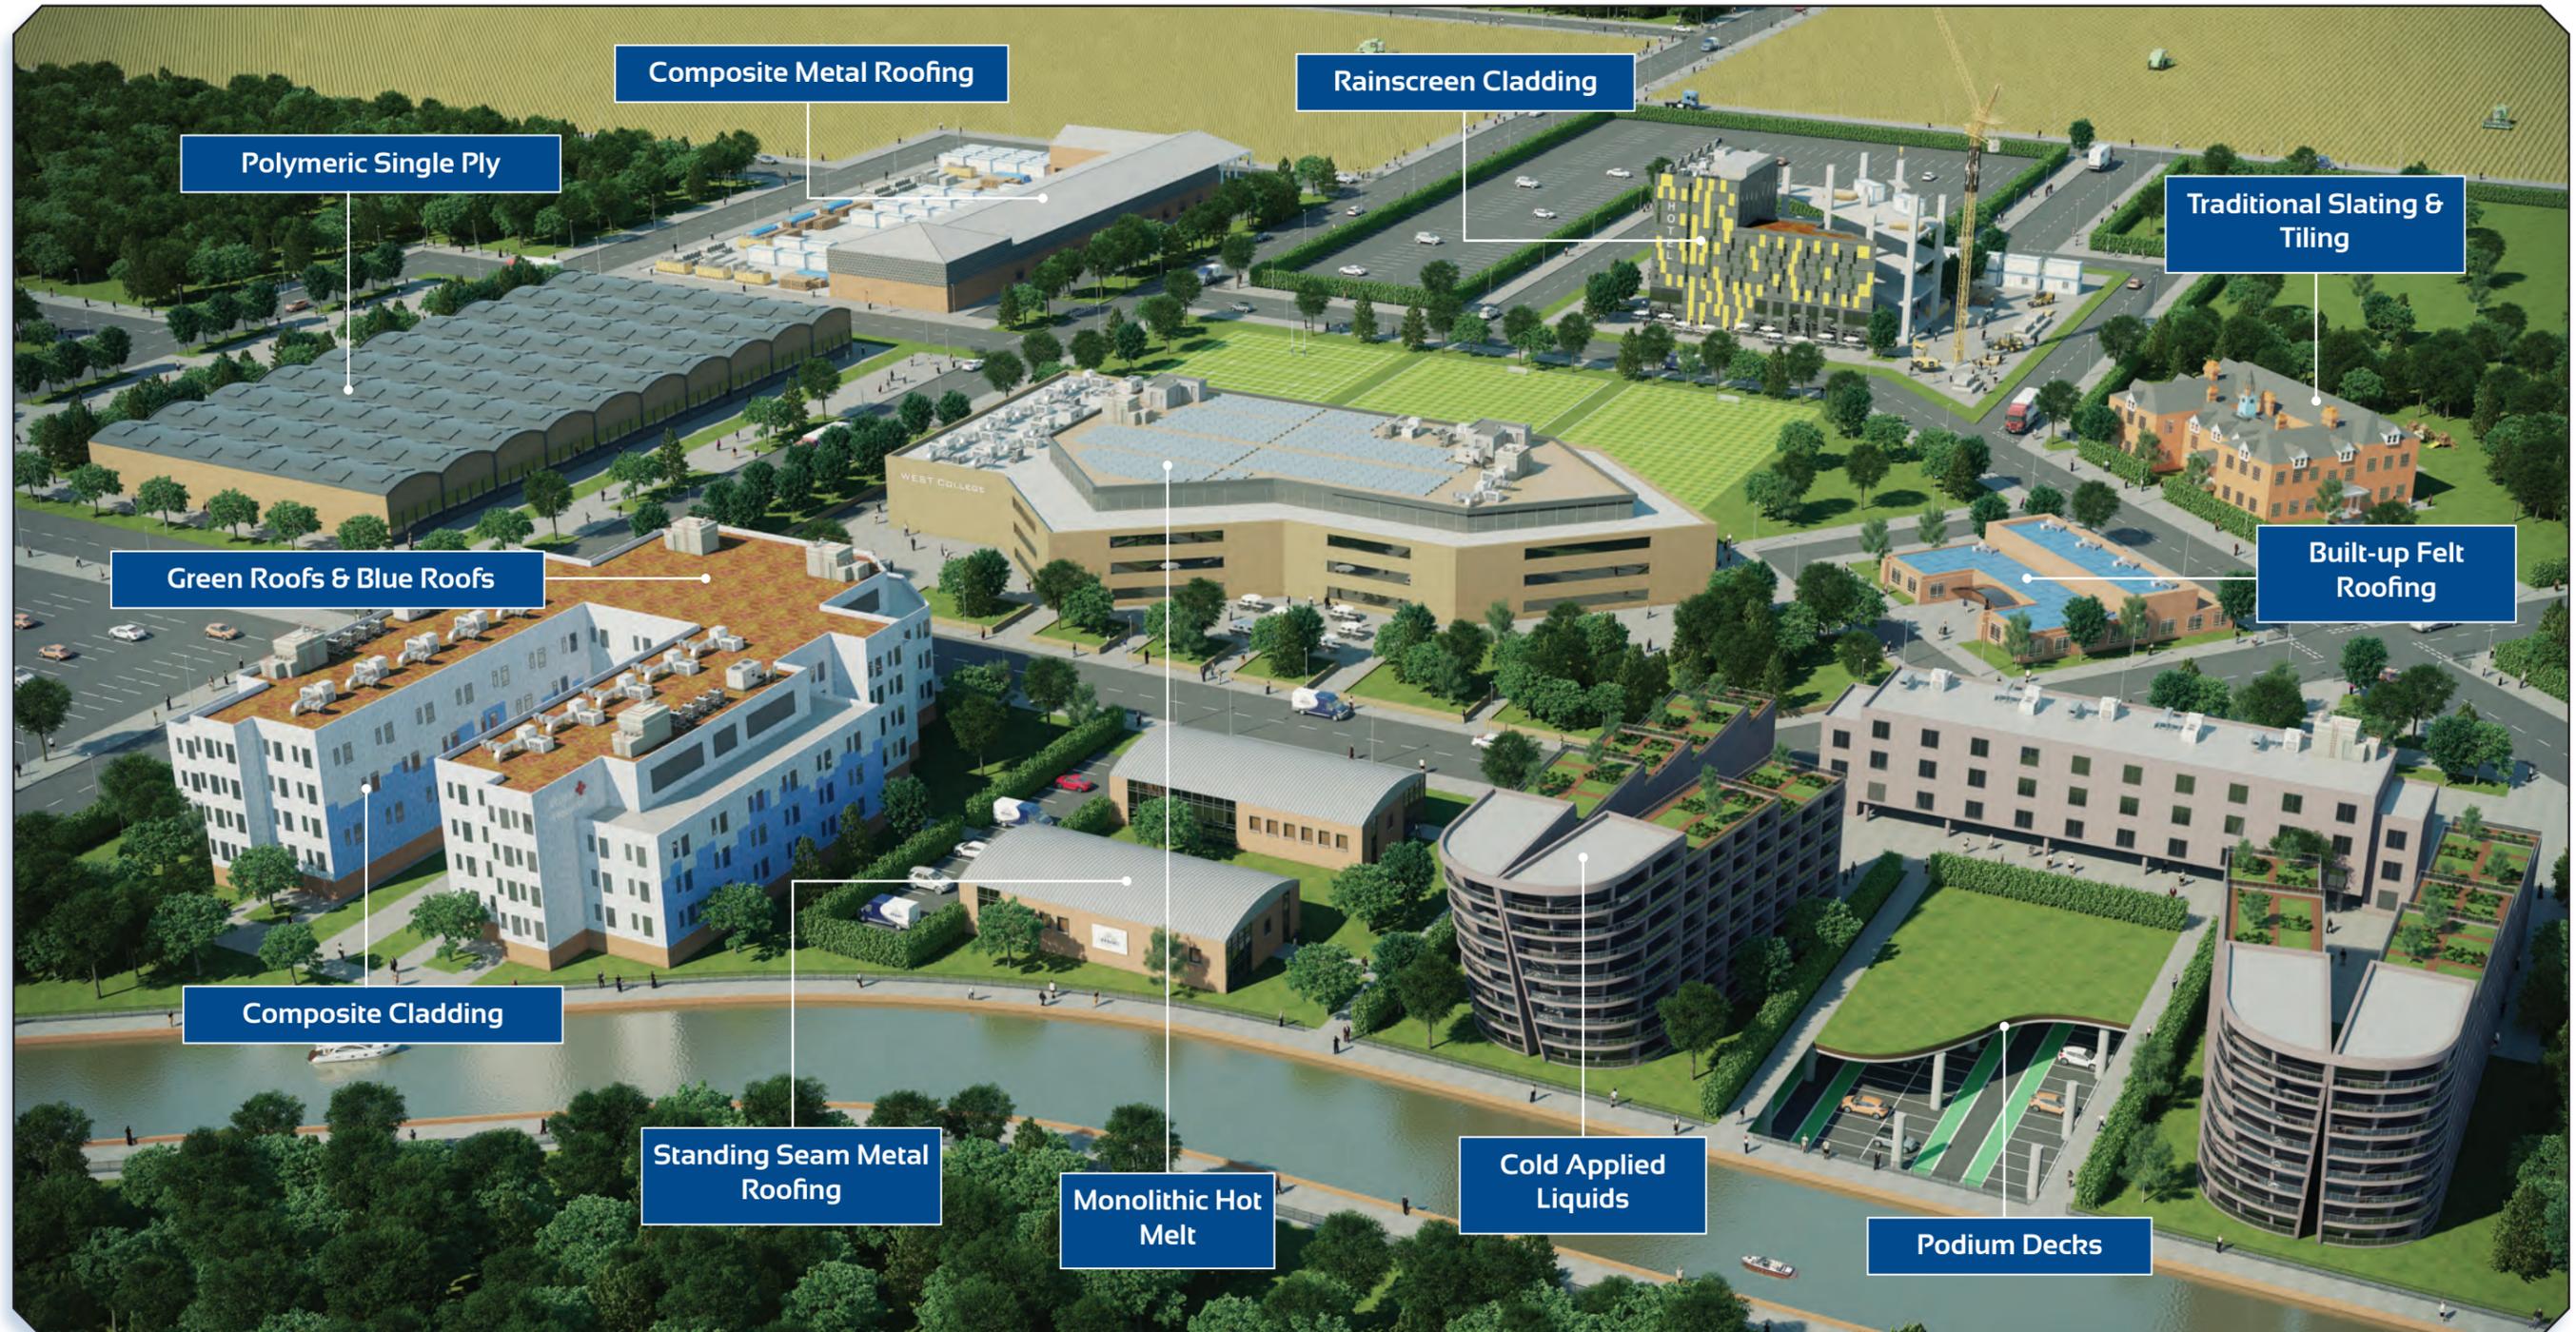

We take our ecological responsibilities seriously and recognise that the environmental performance of a building can be as crucial as the other functions it fulfils.

MAC has implemented an Environmental Management System which fully meets the demands of BS EN ISO 14001:2015. We are also ISO 14064-1 Net Carbon Zero certified, utilising the most sustainable products and installation techniques available and operating stringent quality control and working procedures to minimise waste of materials and energy during site installations.

# A diverse, versatile skill-set.

With strategic locations across the UK, an in-house fabrication division and one of the largest teams of directly employed operatives, MAC has the ability to install virtually any type of flat roofing, pitched roofing or envelope cladding system.
