

ROOFING & CLADDING EXCELLENCE

Specialists in defence & infrastructure sector buildings

www.macgroupuk.com

In this challenging sector, we understand that our roofs are often protecting vital assets and some very sensitive equipment beneath.

Expertise to take on the most challenging roofing projects

Sensitive working environments demand the highest attention to health and safety and a roofing contractor that you can rely on. MAC Roofing has over 40 years' experience working on a range of live sites, and are trusted by clients on utilities and infrastructure projects nationwide.

With a commitment to provide a first class service, MAC Roofing offers the perfect combination of safety, quality and value on each and every project. These core principles, together with a dedicated approach to sustainability and teamworking make MAC the ideal choice for roofing projects in this challenging sector of the market..

The MAC difference

- ✓ Expertise in gas, electricity, water, rail, industrial, telecommunications & defence sectors
- ✓ Full compliance with onsite procedures and operations in high risk areas
- ✓ Financial stability - a partner you can trust
- ✓ Outstanding Health & Safety record
- ✓ Commitment to the highest environmental and social standards
- ✓ Ability to take on projects of any size or complexity, all across the UK
- ✓ Carbon Zero certified with ISO 9001, 14001 & 45001 accreditation

A collaborative approach that makes a real impact

With a wealth of knowledge in a range of roofing and waterproofing disciplines, MAC Roofing understands that not every system is suited to every project. For example, torch-on roofing or certain 'hot works' may not be appropriate for hazardous areas where there are combustible materials on site, or where there is an increased risk of fire or explosion.

When you work with MAC, you will benefit from honest, practical advice that will help ensure that the most appropriate system is specified for your roofing project.

Working with leading manufacturers from across the sector, MAC has access to the latest, innovative roofing solutions, and proven waterproofing systems that will provide many years of reliable protection.

MAC's collaborative approach means that we can also work seamlessly as part of a framework agreement, helping to ensure the ongoing efficient operation of essential services and important assets.

Our positive attitude and ability to build strong relationships across the entire supply chain network has gained us an enviable reputation, as well as the trust and respect of clients, main contractors and specifiers alike.

Whether working direct for the client, or part of a framework agreement, MAC's approach makes it the perfect choice for high risk facilities.

Minimising disruption

The diverse nature of the projects we work on demands a flexible approach that minimises disruption to our clients. We understand that waterproofing activities may only be possible during certain times of the day, and our experienced Project Managers therefore ensure that all onsite work is carried out considerately and safely.

When working on occupied buildings, we endeavour to organise deliveries and installation services so that day-to-day activities can continue unaffected. We are also experienced in working in live working environments, some of which may be sensitive or particularly high risk, and our fully trained and badged Operators carry all of the necessary approvals and accreditations that may be required.

Caring for the environment

At MAC we create living and working spaces for people to enjoy, making a positive difference to the occupants of buildings and local communities.

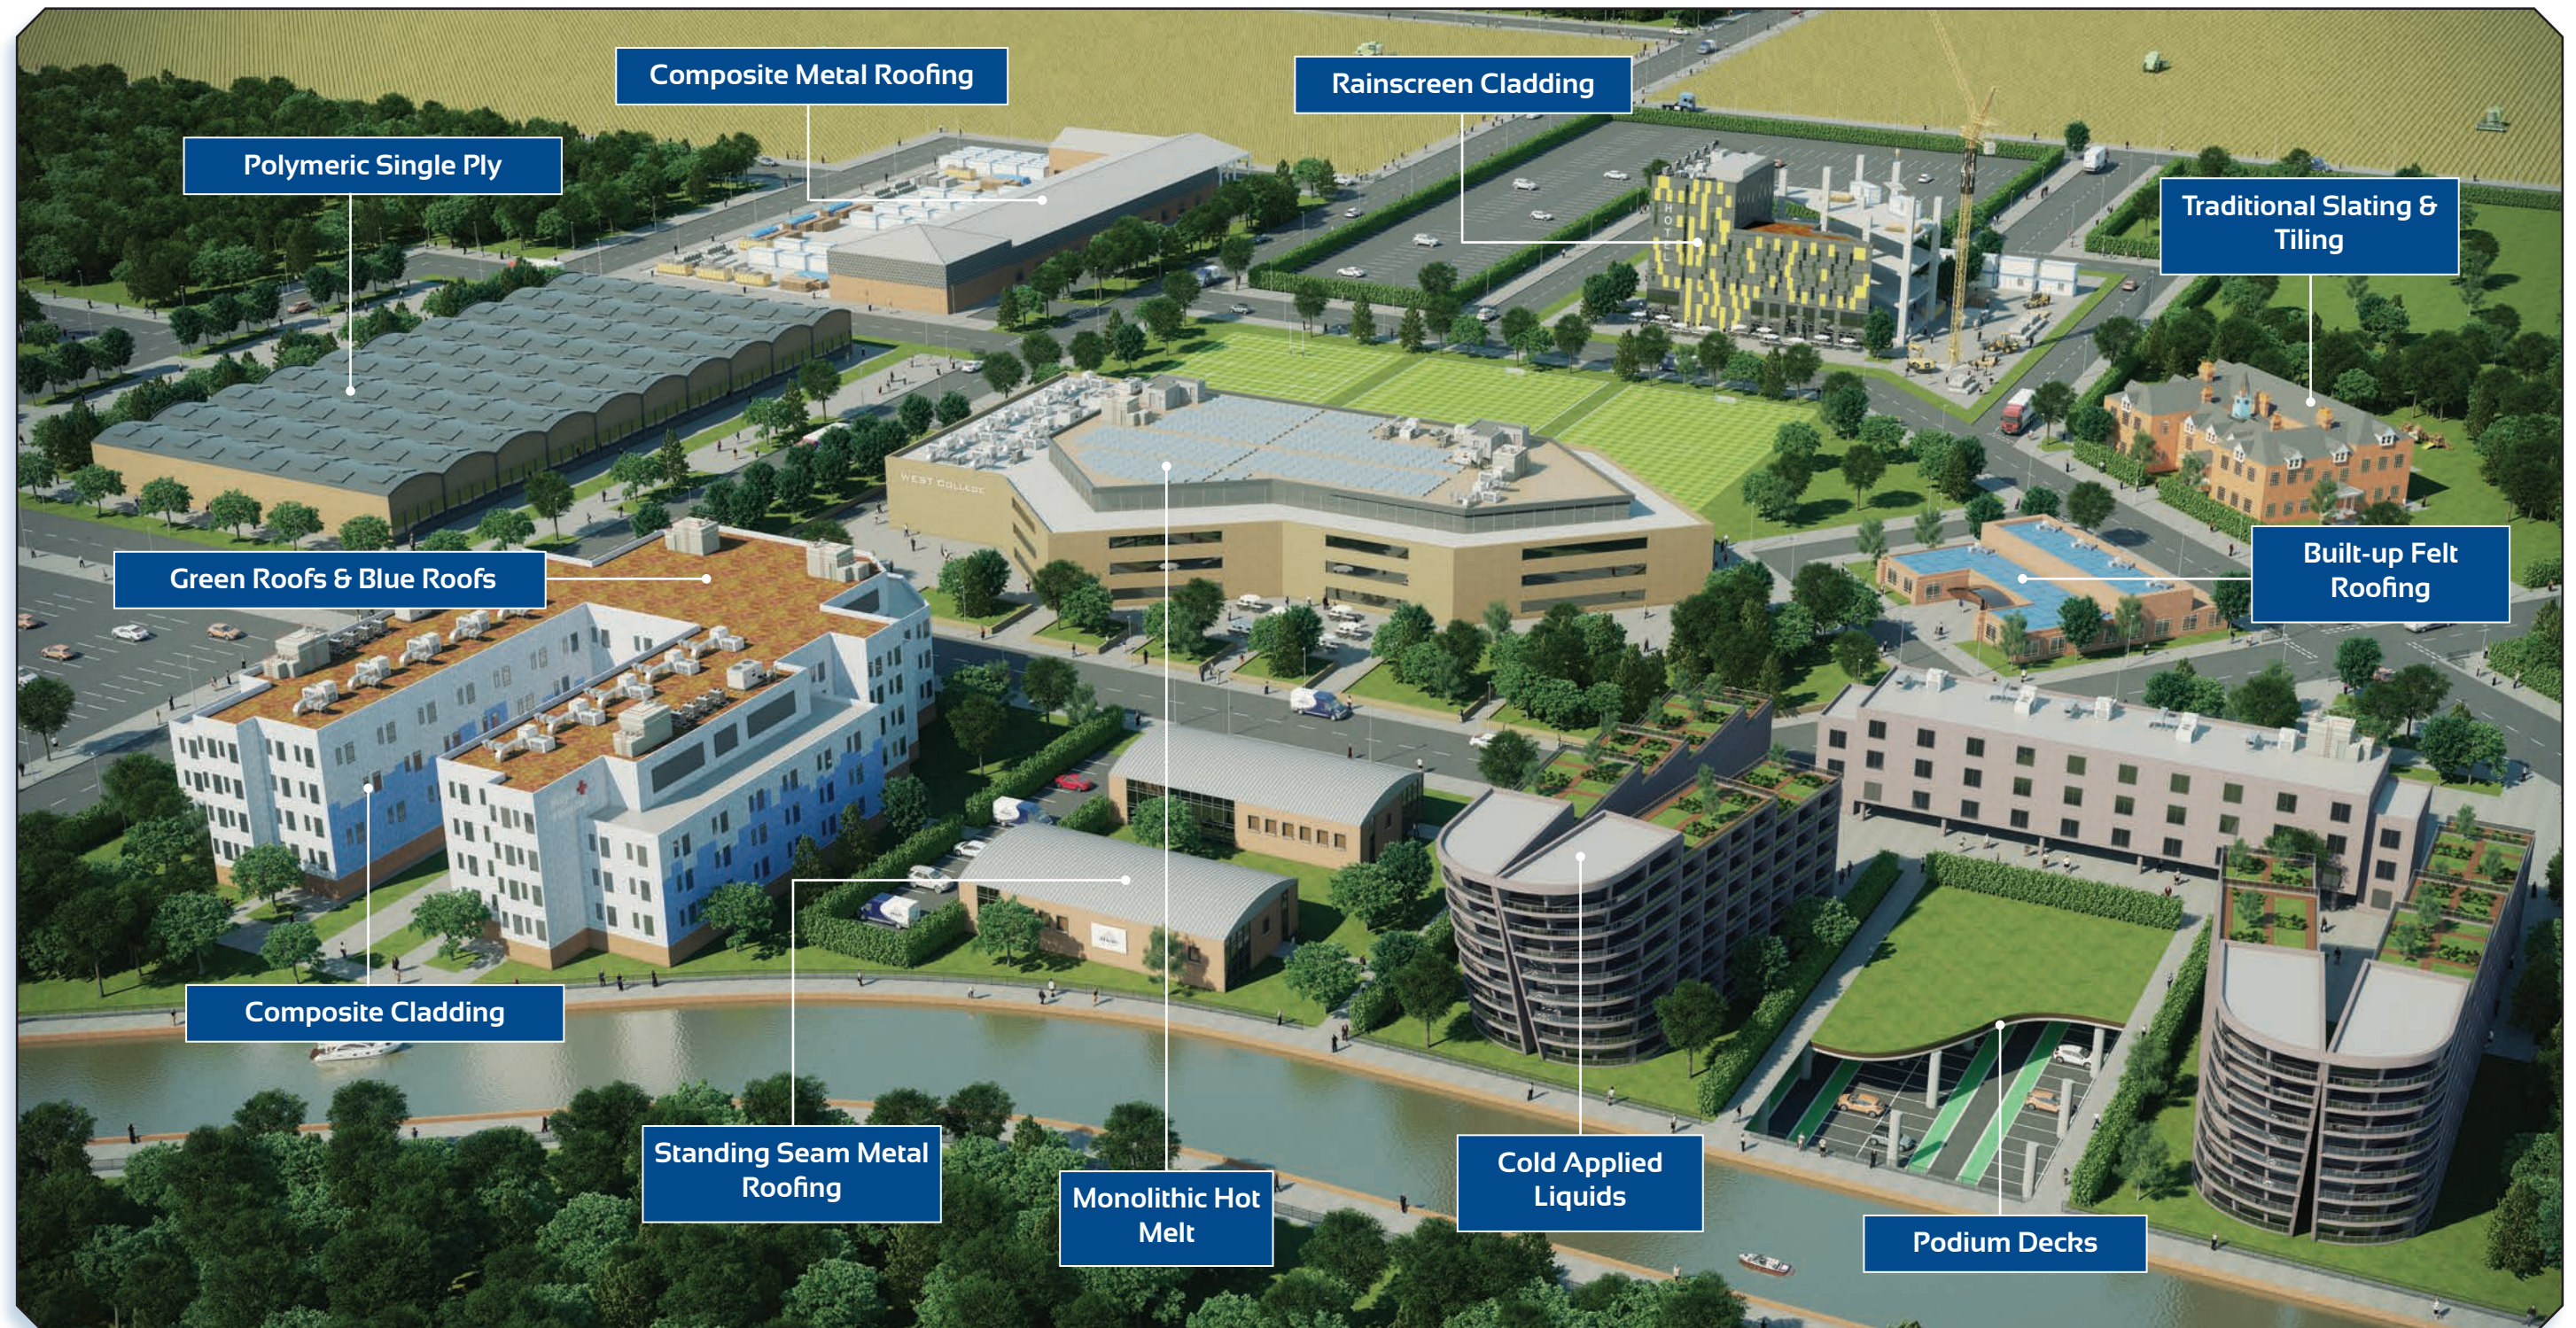

We take our ecological responsibilities seriously and recognise that the environmental performance of a building can be as crucial as the other functions it fulfils.

MAC has implemented an Environmental Management System which fully meets the demands of BS EN ISO 14001:2015. We are also Net Carbon Zero certified, utilising the most sustainable products and installation techniques available and operating stringent quality control and working procedures to minimise waste of materials and energy during site installations.

A diverse, versatile skill-set.

With strategic locations across the UK, an in-house fabrication division and one of the largest teams of directly employed operatives, MAC has the ability to install virtually any type of flat roofing, pitched roofing or envelope cladding system.

Coverage & capability.

Based in Bromborough, Wirral, and with additional offices situated nationwide, MAC has the financial capability and technical expertise to take on projects of any scale, anywhere in the UK.

We offer specification advice and full technical support across a broad range of external waterproofing disciplines, and work closely with the UK's leading manufacturers and other supply chain partners to maximise efficiencies on every project. Our dynamic, flexible approach also means that we help clients meet tight project deadlines and achieve their budgetary targets.
