STEM Building, University of Birmingham
Hot Melt, Single Ply & Anodised Aluminium Shingle Cladding

With a wealth of successful projects across the UK, MAC's experience in the education sector stretches back over four decades

Leading the way in school roofing and cladding expertise

MAC has been successfully involved with school roofing programmes for over 45 years. With extensive experience in all aspects of roofing and cladding, we can offer independent, impartial advice, ensuring that the most appropriate system is specified to meet the requirements of each and every school.

Trusted to deliver results

MAC has a proven track record of delivering successful roofing partnerships with schools and local authorities across the UK. For example, MAC has worked for Wirral Borough Council for over 25 years, and operates a full 24/7 repair and maintenance service for this authority. This includes an "all year round" installation service (not just school holidays), which effectively enables Wirral Borough Council to refurbish one additional school per year for the same annual budget.

For additional peace-of-mind, MAC can provide a cost-effective annual maintenance programme, enabling schools and other educational establishments to keep on top of essential regular roof maintenance. Not only does this help ensure a safe learning environment for pupils and staff, it also minimised any classroom disruption caused by unforeseen problems on the roof.

Lightweight Composite Metal Roof Tiles

The MAC difference

- ✓ Successful track record of working with educational establishments across the UK
- ✓ Ability to work around school hours and meet tight deadlines
- ✓ Flexible approach to minimise any disruption to teaching
- ✓ Outstanding health & safety record
- ✓ Diverse skill-set including expertise in flat & pitched roofing, cladding and sustainable waterproofing systems
- ✓ Carbon Zero certified with ISO 9001, 14001 & 45001 accreditation

Specialists in both new build and refurbishment projects

At MAC we understand that two of the key ingredients to a successful roofing partnership are flexibility and good communication. Whether it's organising carefully planned deliveries outside of school hours, working at weekends or managing noise levels on site, MAC takes a considerate approach at all times.

In addition, an ability to meet tight deadlines and an unwavering commitment to the highest standards of health and safety mean that MAC continues to be the first choice for local authorities, consultants and schools nationwide.

Working with some of the UK's leading manufacturers, MAC is able to offer installation expertise across a broad range of external waterproofing disciplines.

The Perfect System to Meet Your Requirements

- ✓ **Flat Roofing**
 - Polymeric Single Ply Systems
 - Monolithic Hot Melt Systems
 - Built-up Felt Roofing Systems
 - Cold Applied Liquid Systems
- ✓ **Pitched Roofing**
 - Standing Seam Metal Roofing
 - Metal Composite Roofing
 - Concrete & Clay Tiling
 - Traditional Slating
 - Lightweight Composite Roof Tile Systems
- ✓ **Specialist Wall Cladding Systems**
- ✓ **Sustainable Roofing**
 - Solar energy roofs (PV)
 - Green roofing systems

Completing projects safely

MAC employs over 150 operatives, including roofers, cladders, joiners and plumbers, giving our clients access to an unrivalled, multi-disciplined installation service.

Safety is also extremely important when carrying out roofing or cladding projects of any kind. The health and wellbeing of all individuals onsite is our number one priority and we take all necessary steps to achieve this. MAC has an outstanding health and safety record and holds numerous industry accreditations in this area.

Minimising disruption

The diverse nature of the projects we work on demands a flexible approach that minimises disruption to our clients. We understand that waterproofing activities may only be possible during certain times of the day, and our experienced Project Managers therefore ensure that all onsite work is carried out considerately and safely.

When working on occupied buildings, we endeavour to organise deliveries and installation services so that day-to-day activities can continue unaffected. We are also experienced in working in live working environments, some of which may be sensitive or particularly high risk, and our fully trained and badged Operators carry all of the necessary approvals and accreditations that may be required.

Caring for the environment

At MAC we create living and working spaces for people to enjoy, making a positive difference to the occupants of buildings and local communities.

We take our ecological responsibilities seriously and recognise that the environmental performance of a building can be as crucial as the other functions it fulfils.

MAC has implemented an Environmental Management System which fully meets the demands of BS EN ISO 14001:2015. We are also Net Carbon Zero certified, utilising the most sustainable products and installation techniques available and operating stringent quality control and working procedures to minimise waste of materials and energy during site installations.

A diverse, versatile skill-set.

With strategic locations across the UK, an in-house fabrication division and one of the largest teams of directly employed operatives, MAC has the ability to install virtually any type of flat roofing, pitched roofing or envelope cladding system.
