

# ROOFING & CLADDING EXCELLENCE

Specialists in heritage sector buildings

[www.macgroupuk.com](http://www.macgroupuk.com)

Camden Town Hall, London  
Westmorland Green Slate & Specialist Leadworking

# At MAC we have almost half a century's experience in protecting the nation's listed buildings and heritage structures.

## Trusted to preserve and restore historic buildings across the UK

At MAC we have almost half a century's experience in protecting the nation's heritage structures. From listed buildings and scheduled monuments to World Heritage Sites, MAC can be trusted to deliver exceptional waterproofing protection in a sensitive, safe and considerate manner.

## A tailored solution approach

We understand that each heritage site is truly unique and tailor our solutions to perfectly match the material requirements of the building and preserve its historical significance.

MAC's roofing and waterproofing experts understand the sensitivities involved in working within the heritage sector, and we work closely with historians, architects, and preservation specialists as required on each project.

We recognise that our job is to waterproof and protect heritage structures in a way that preserves key historic features, such as facades, materials, and architectural details. Our highly skilled operatives are therefore trusted to provide the craftsmanship and know-how required to extend the building's life whilst also maintaining its authenticity.

Welsh Penrhyn Slating with Code 7 Leadworking

## The MAC difference

- ✓ Over four decades of experience caring for heritage structures and listed buildings nationwide
- ✓ Fully trained in-house craftsmen with knowledge and skills in traditional methods of construction
- ✓ Ability to take on a diverse range of roofing & cladding projects
- ✓ Expertise in both flat & pitched roofing disciplines, as well as specialist cladding
- ✓ Exceptional standards of Health & Safety on every project
- ✓ Carbon Zero certified with ISO 9001, 14001 & 45001 accreditation

## Completing projects safely

MAC employs over 150 operatives, including roofers, cladders, joiners and plumbers, giving our clients access to an unrivalled, multi-disciplined installation service.

Safety is also extremely important when carrying out roofing or cladding projects of any kind. The health and wellbeing of all individuals onsite is our number one priority and we take all necessary steps to achieve this. MAC has an outstanding health and safety record and holds numerous industry accreditations in this area.

## Exceptional technical support

Our friendly team of technical experts have the expertise and insight that will help ensure that your project runs smoothly, ultimately saving you money.

At MAC we install quality roofing and cladding systems from the UK's leading manufacturers which are fully supported by meaningful guarantees.

In addition, we provide a full technical support service, including:

- ✓ Initial advice & guidance
- ✓ On-site surveys
- ✓ Comprehensive reports
- ✓ Bespoke specifications

Birkenhead Town Hall  
Penrhyn Welsh Slating, Specialist Code 7 Leadworking

## Minimising disruption

The diverse nature of the projects we work on demands a flexible approach that minimises disruption to our clients. We understand that waterproofing activities may only be possible during certain times of the day, and our experienced Project Managers therefore ensure that all onsite work is carried out considerately and safely.

When working on occupied buildings, we endeavour to organise deliveries and installation services so that day-to-day activities can continue unaffected. We are also experienced in working in live working environments, some of which may be sensitive or particularly high risk, and our fully trained and badged Operators carry all of the necessary approvals and accreditations that may be required.

## Caring for the environment

At MAC we create living and working spaces for people to enjoy, making a positive difference to the occupants of buildings and local communities.

We take our ecological responsibilities seriously and recognise that the environmental performance of a building can be as crucial as the other functions it fulfils.

MAC has implemented an Environmental Management System which fully meets the demands of BS EN ISO 14001:2015. We are also Net Carbon Zero certified, utilising the most sustainable products and installation techniques available and operating stringent quality control and working procedures to minimise waste of materials and energy during site installations.

# A diverse, versatile skill-set.

With strategic locations across the UK, an in-house fabrication division and one of the largest teams of directly employed operatives, MAC has the ability to install virtually any type of flat roofing, pitched roofing or envelope cladding system.
